

INTERNSHIP REPORT – TASK 1

Title: Data Science Internship – Task 1 Report

1. Student Details

- Name: Sangepu Keerthana
- College: Malla Reddy Engineering College for Women (MRECW)
- Date: 15 May 2026

2. Internship Details

- Internship Domain: Data Science
- Task: Task 1 Completion Report
- Platform Used: Google Colab

3. Objective

The objective of this task is to perform basic data analysis using Python in Google Colab, generate visualizations, and understand fundamental data science concepts.

4. Tools Used

- Google Colab
- Python Programming Language
- Pandas Library
- NumPy Library
- Matplotlib / Seaborn (for graphs)

5. Work Done

- Created and executed Python code in Google Colab
- Imported required libraries for data analysis
- Performed basic data processing and exploration
- Generated graphs for visualization of data
- Verified outputs without errors

6. Outputs / Visualizations

- Data tables were successfully displayed
- Graphs were generated using Matplotlib/Seaborn
- Results were analyzed based on dataset patterns

7. Conclusion

Task 1 was successfully completed in Google Colab. The analysis helped in understanding basic data handling, visualization, and Python programming concepts used in data science.
